

MAKER'S MIDNIGHT

PRODUCT DATA SHEET

Maker's Midnight is made from premium 2-row barley.

Midnight is what happens when you max out your kiln and walk away for a few hours. There is a beautiful note of dark fruit reminiscent of a dark red Bordeaux that we believe is accentuated by our extremely unique process. The malt will also contribute chocolate and move into the roasted spectrum. At first glance this malt looks mild, but come to the dark side with caution...

PRICING

\$65/25 kg bag

PRODUCTION

Maker's Malts farm collective is located between the North and South Saskatchewan Rivers in the Sask Valley. The area boasts some of the best barley growing dirt in the world. Our barley is uniquely grown in reserve plots for Maker's Malt and our small scale allows for rigorous selection. Maker's unique vertical integration of grower and maltster allows us to align our agronomic practices purely with quality in mind.

PACKAGING

Maker's Midnight is currently available in 25 kg bags. It is packaged and available within days of being malted for optimal freshness. Call for special bulk orders.

USAGE

Maker's Midnight is a high-kilned malt and should be used as a specialty product to add color and unique dark flavors.
